

Painting & Palette Knives

Is it a Palette or Painting Knife?

A palette knife was designed for mixing and works best for that purpose, although many artists will use it for painting. There are many qualities of palette knives.

We manufacture an inexpensive plastic knife for the beginner. This comes in the traditional flat and also

the offset. The offset is easier to work with as it helps to keep ones knuckles out of the paint.

Palette knives will vary in quality, spring and length. We make three qualities and a variety of sizes. Each responds in a different way.

After extended use in water, steel knives may begin to rust. The stain-

less steel knives work beautifully and will not rust.

Finally, we carry a complete line of large, tempered steel spatulas for large work or applying gesso.

Ample time and thought should go into the selection of a palette knife to ensure getting the correct tool for the project at hand.

Stainless Steel Spatulas

A selection of the finest Italian Steel Spatulas. Painters of Frescos and large landscapes are always looking for high quality knives. These are the best. Print makers mixing ink or painters will find this an excellent selection. All knives have beautiful hand shaped and polished wood handles. Made by artists for artists.

Steel Painting & Palette Knives

Richeson Painting Knives One Piece Tempered Steel

For painting in the impasto technique or mixing and scraping paint, these steel, trowel-style blades are great. This line offers a selection of 36 different blade shapes. These knives have been hand forged by the same family for over 100 years. Each knife is mounted to a hand polished rosewood handle. The size and shape of the blade result in great differences in spring and control. Always “dry” test the knife before purchasing.
